

SUDEP stands for  
**SUDDEN UNEXPECTED DEATH in EPILEPSY**  
It is when a person with epilepsy dies suddenly and prematurely and no other cause of death is found

There are  
**600,000**  
people with  
**EPILEPSY**  
in the  
UK

**21**  
people with  
**EPILEPSY**  
die every week in the  
UK

1 in 103 people  
are diagnosed with epilepsy

Over 1,000 epilepsy  
deaths a year

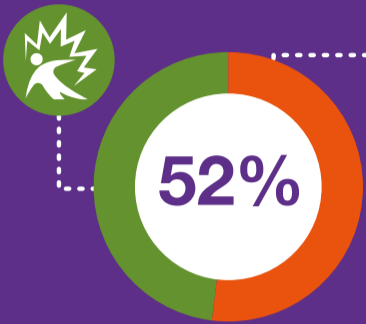

**?** The causes  
of SUDEP  
are currently  
unknown

It can happen  
to both adults  
and children  
with epilepsy

**50%** Up to 50% of  
epilepsy related  
deaths are SUDEP

The best way to lower risks of SUDEP is by achieving seizure freedom

In the UK 52% of  
people with epilepsy  
are seizure free

70% could become  
so with the right  
treatment and advice

## RISK FACTORS INCLUDE

Having active seizures  
not controlled  
by medication

Not taking  
medication regularly  
and as prescribed

Having tonic clonic  
seizures (sometimes called  
Grand-Mal or  
Convulsive Seizures)

Having seizures  
at night or seizures  
when asleep

Having complex health needs  
eg: learning disability,  
other health conditions  
or pregnancy

Risks vary between  
people and can change  
over time – speak to  
your Health Professional  
about your individual risks

You don't have to have  
frequent seizures to be  
at risk from SUDEP.  
Even if your seizures  
are controlled you  
should still take your  
medication and have  
a regular review

Don't make any changes  
to your epilepsy treatment  
without first speaking with  
your Health Professional

## TAKE POSITIVE ACTION

*Be aware*

of your epilepsy risks – knowledge saves lives;  
risk doesn't have to be scary with the right information

*Be open*

with yourself and others about your epilepsy  
and any risks you may face – help smash the stigma

*Be proactive*

about risk – take positive actions to reduce them, for example:

Discuss epilepsy/SUDEP risks with your  
Health Professional  
– take information to support you if helpful

Request a regular review with your Health  
Professional to discuss your epilepsy,  
risks and any changes

Create a care plan with your Health  
Professionals to show the best ways to  
help you live well

Take control of checking your epilepsy  
in-between medical appointments: tools  
like seizure diaries, medication reminders  
and risk monitoring apps can help you  
stay aware and in control
